

Using “Power Grid Expansion (Recharged Version): The New Power Plants - Set 2” with the other expansions

Note

If you are playing Power Grid with Recharged rules and using the Recharged Version of the “The New Power Plants – Set 2”, changes may be necessary if you choose to play any of the Recharged expansion maps. These changes are listed below.

Expansion “France/Italy”

France

Preparation

- Before preparing the power plant market and the power plant stack, remove the environmental power plant 11. Place the power plant 11 back into the game box; it is not used during the game.
- Take the nuclear power plant 13 and place it in the power plant market. Shuffle the remaining power plants with plugs on the back and add 7 of these to the market.
- Continue with power plant stack preparation as normal for this expansion.

Italy

Italian Nuclear Power Phase-Out

- After a player buys the nuclear power plant 37 in Phase 2 (Auction Power Plants), there is no further resupply of uranium. If the nuclear power plant 37 was not bought by a player or removed from the game during preparation, this is not triggered.

Expansion “Benelux/Central Europe”

Benelux

No changes are required for “The New Power Plants – Set 2 (Recharged Version)” deck.

Central Europe

No changes are required for “The New Power Plants – Set 2 (Recharged Version)” deck.

Expansion “China/Korea”

China

Preparation

- Depending on the number of players, remove the following power plants from the game and place them in the box:
 - with 2 and 3 players: 03, 06, 10, 13, 17, 18, 25, 26, 31, 34, 35
 - with 4 players: 03, 06, 13, 17, 26, 31, 35
 - with 5 and 6 players: 03, 06, 31
- Sort the remaining power plants as described below and place them as a face-down power plant stack:
 - shuffle power plants 36-50 and place them face-down at the bottom of the power plant stack
 - shuffle the remaining power plants in the range 32-35 (two power plants with 2 and 3 players, three power plants with 4 players, four power plants with 5 and 6 players), along with the Step 3 card and place them face-down on top of the higher numbers already placed on the power plant stack.
 - sort power plants 04-30 in ascending order with power plant 30 on the bottom and power plant 04 on the top and place them face-down on the power plant stack.
- The resulting power plant stack will have power plants 04-30 from the top, power plants 32-35 and the step 3 card will be next, in random order, and power plants 36-50 will be on the bottom, also in random order.

Phase 2: Auction Power Plants

In this version, there is no future power plant market. All power plants are always placed and available in the current market.

The first round

In the first round, place one power plant in the power plant market for each player (with 2 players, use power plants 04 and 05, with 3 players use power plants 04, 05, and 07, etc.). The players buy the power plants at auction as normal, and each player must buy exactly one power plant in the first round.

Korea

No changes are required for “The New Power Plants – Set 2 (Recharged Version)” deck.

Expansion “Brazil/Spain & Portugal”

Brazil

Preparation

- Place the biogas power plants 05 and 14 into the power plant market. Then shuffle the remaining power plants with a plug on the back. Place 6 of these into the market.
- When preparing the power plant stack, please set aside all of the remaining biogas power plants (16, 19, 26, and 39) before removing power plants depending on the number of players. Afterward, shuffle all the biogas plants that had been set aside with the other power plants.

Spain & Portugal

Preparation

- First, sort out environmental power plants 17, 24, and 28 from the power plant stack and set them aside, face up.

Step 2

At the beginning of Step 2, place the three power plants 17, 24, and 28 on top of the power plant stack in ascending order so that the power plant 17 is on top, then the 24, and finally the 28. Thus, power plant 17 is drawn to replace the smallest power plant in Step 2.

Expansion "Russia/Japan"

Russia

Preparation

- Remove the garbage power plants 05 and 14 from the game and place them back in the game box.

Japan

No changes are required for "The New Power Plants – Set 2 (Recharged Version)" deck.

Expansion "The Robots"

No changes are required for "The New Power Plants – Set 2 (Recharged Version)" deck.

Expansion "Northern Europe/United Kingdom & Ireland"

Northern Europe

Preparation

- For each region in play add the two new power plants for that region and remove the old power plants with the same numbers.
- If Norway is in play ensure that the 07 power plant is included with the power plants with a plug on the back before preparing the power plant market.
- If Sweden (South) is in play ensure that the 10 power plant is included with the power plants with a plug on the back preparing the power plant market.

United Kingdom & Ireland

No changes are required for "The New Power Plants – Set 2 (Recharged Version)" deck.

Expansion "Australia/Indian Subcontinent"

Australia

Preparation

- Before preparing the power plant market and the power plant stack, remove the nuclear power plant 21. Place the power plant 21 back into the game box; it is not used during the game.

Indian Subcontinent

Preparation

- Before preparing the power plant market and the power plant stack, remove the nuclear power plant 13. Place the power plant 13 back into the game box; it is not used during the game.

Expansion "The Stock Companies"

No changes are required for "The New Power Plants – Set 2 (Recharged Version)" deck.

Expansion "Middle East/South Africa"

Middle East

Preparation

- At the start of the game and during Step 1, the players do not have access to garbage or nuclear power plants. After preparing the power plant market and the power plant stack, remove the power plants 05, 13, and 14 if they appear in the current market and return them to the box.

Phase 3: Buying Resources

- During Step 1, the players do not have access to garbage so may only buy oil for hybrid power plants. Once step 2 has begun, players may buy garbage resources.

South Africa

Preparation

- Before preparing the power plant market and the power plant stack, remove the oil power plant 10. Place the power plant 10 back into the game box; it is not used during the game.

Expansion “Europe/North America”

Europe

No changes are required for “The New Power Plants – Set 2 (Recharged Version)” deck.

North America

No changes are required for “The New Power Plants – Set 2 (Recharged Version)” deck.

Expansion “Québec/Baden-Württemberg”

Québec

Preparation

- First, place the environmental power plant 11 into the power plant market. Then shuffle the remaining power plants with a plug on the back. Draw 7 cards from this set and place them into the market. Set aside environmental power plants 17 and 24 face up.
- Continue with power plant stack preparation as normal and then place the power plants 17 and 24 on top of the power plant stack in ascending order.

Baden-Württemberg

No changes are required for “The New Power Plants – Set 2 (Recharged Version)” deck.

Base Game “Germany/USA”

Germany

German Nuclear Power Phase-Out

- After a player buys the nuclear power plant 37 in Phase 2 (Auction Power Plants), there is no further resupply of uranium. If the nuclear power plant 37 was not bought by a player or removed from the game during preparation, this is not triggered.

USA

No changes are required for “The New Power Plants – Set 2 (Recharged Version)” deck.
